

Knowledge areas – 3. Installation, Operation & Configuration

Environment and Deployment, <http://world.episerver.com/documentation/developer-guides/CMS/Deployment/>

Error handling, <http://world.episerver.com/documentation/developer-guides/CMS/logging/>

License model, <https://license.episerver.com/>

Mirroring, <http://world.episerver.com/documentation/developer-guides/CMS/Deployment/mirroring2/>

Add-ons, <http://world.episerver.com/documentation/developer-guides/CMS/add-ons/> and <http://webhelp.episerver.com/latest/addons/addons.htm>

Homework for Wednesday evening

- Review the CMS documentation at <http://world.episerver.com/cms/>
- Review the available services at <http://www.episerver.com/services/>
- Review the available add-ons at <http://www.episerver.com/partners/add-on-store/>

Knowledge areas – 4. Creating Websites in Episerver CMS

Technical architecture, <http://world.episerver.com/documentation/developer-guides/CMS/architecture/>

Authentication, <http://world.episerver.com/documentation/developer-guides/CMS/security/>

Classes and interfaces, <http://world.episerver.com/documentation/class-libraries/cms/>

Globalization, <http://world.episerver.com/documentation/developer-guides/CMS/globalization/>

Performance, <https://talk.alfnilsson.se/2015/11/25/code-best-practices-and-performance-optimization-the-summary/>

Dynamic Data Store, <http://world.episerver.com/documentation/developer-guides/CMS/dynamic-data-store/>

Personalization, <http://world.episerver.com/documentation/developer-guides/CMS/personalization/>

When reviewing the documentation take special care to read **Notes** because they warn about limitations or non-standard behavior that tend to appear in exam questions. For example:

Note: Episerver CM0 and Episerver Commerce do not support mirroring. Also, content mirroring is not supported in cloud deployment such as Windows Azure Web Apps and Episerver Digital Experience Cloud [DXC].
