

Knowledge areas – 5. Advanced Concepts

Scheduled jobs, <http://world.episerver.com/documentation/developer-guides/CMS/scheduled-jobs/>

Initialization modules, <http://world.episerver.com/documentation/developer-guides/CMS/initialization/>

Plug-ins and Extending the Episerver UI, <http://world.episerver.com/documentation/developer-guides/CMS/user-interface/>

Integration, <http://world.episerver.com/documentation/developer-guides/CMS/routing/partial-routing/>

Content provider, <http://world.episerver.com/documentation/developer-guides/CMS/Content/Content-providers/>

Homework for Thursday evening

Create a two-page summary about all the ways Episerver CMS can be extended including the interfaces, classes, and attributes you would need to use, getting a reference to the content repository or other service, creating and saving a new content item, and so on.
