

Knowledge areas – 2. Content Model

Rendering, <http://world.episerver.com/documentation/developer-guides/CMS/rendering/>

Content types and models, <http://world.episerver.com/documentation/developer-guides/CMS/Content/>

Essential classes, <http://world.episerver.com/documentation/class-libraries/cms/>

Properties, <http://world.episerver.com/documentation/developer-guides/CMS/Content/Properties/>

Validation, <http://world.episerver.com/documentation/developer-guides/CMS/Content/Validation/>

Homework for Tuesday evening

Create a two-page summary of the essential interfaces and classes in Episerver CMS, and the most important code patterns e.g. defining a new content type, defining a content template (controller + view), using [TemplateDescriptor] to have multiple content templates for a single content type, how to create a custom property validator, rendering properties in a view, and so on.
